

- 4. Article Two, B.5- Water Quality Monitoring (“WQM”) Plan – Report on whether any of the semi-annual (or annual) WQM required under Article Two, B.5, was conducted during the quarter, and if so, in which sewer basins, and report the results of that monitoring (both BST and fecal coliform) for each such sewer basin.**

A limited round of water quality samples was collected on June 28, 2010. Quarterly sampling from one station in each of four sewer basins is supplemental to the annual and semi-annual sampling program. Human source fecal bacteria were identified in the samples from one sewer basin. Results are presented below.

A semi-annual round of water quality samples was collected on October 12, 2010. Twenty of the twenty-six sewer basins were sampled. Results will be reported in the Fourth Quarter of 2010.
